

Clark Forklift

Currently, there are at least 350,000 Clark forklifts performing globally, and more than 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 specific parts fabricated for 20 exclusive designs of lift trucks and automated equipment. Your regional Clark Seller is your complete source for availability of all your parts needs offered by Clark Totalift.

Clark features a phenomenal Parts Supply team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the operator restraint system. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark's continual effort to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first forklift producer across the globe to be certified with the globally accepted quality standard ISO 9001 for every one of their manufacturing facilities. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Lean Production

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants because this technique is extremely economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is intended to find and acknowledge the most efficient methods for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engineering

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The contemporary value engineering program combines progressive product development and offers improved client support and service within the industry.
